

A Reality More Frightful Than Halloween...

FIGHTING TODAY'S CYBER THREAT LANDSCAPE

October is National Security Awareness month. Coordinated & led by the National Cyber Security Alliance and the Department of Homeland Security, this event encourages individuals, business and government to collaborate on cybercrime prevention...
OUR SHARED RESPONSIBILITY

FRAUDSTERS ARE NOT ZOMBIES
 Cyber criminals are far from brainless zombies...they are constantly getting smarter.

FRAUDSTERS ARE SOPHISTICATED LIKE DRACULA
 The existing tactics that fraudsters use work well enough to make them comfortable—much like Dracula when he is resting in Bran Castle in Transylvania.

FRAUDSTERS USE DIGITAL IDENTITIES TO HAUNT NETWORKS
 Fraudsters haunt your networks by replaying stolen identities using proxies, device and location spoofing to cloak their true identities, or piggyback a user's session with malware attacks.

DATA BREACHS ARE MULTIPLYING LIKE LEFTOVER HALLOWEEN CANDY
 Time to stop storing too much information in vulnerable locations – which is sweet enticement for cyber criminals.

5 TIME TO GEAR UP IN YOUR SUPERHERO COSTUME

CYBER SECURITY IS A SHARED RESPONSIBILITY
 We all need to band together to fight evil forces that lurk within the darkest places of the internet.

In addition to keeping your eyes open for ghosts and zombies, we recommend facing something even scarier...the prospect of a business and reputation damaging

DATA BREACH
