

# Blackboard®

## Revenue

USD ~ \$700 M

## Deployment Location

North America

## Industry

Internet Software  
Educational Software

## Products

Oracle PBCS

## Legacy Platform

Hyperion Planning 11.1.2.3.500

## Partner Use Case Summary

SC&H Group migrated an on premises Oracle Hyperion Planning application to Oracle EPBCS and implemented a number of enhancements. Through the enhancement process, SC&H was able to simplify dimensionality while also providing increased planning flexibility by allowing multi-level of detailed planning. The implementation of an additional revenue cube and currency dimension provided better business revenue planning and multi-currency reporting.

## Top Customer Objectives and Challenges

- Minimal to no reliance on the IT team to maintain the system, perform server upgrades, and Oracle patching.
- Ability to edit metadata in smart view.
- Capability to perform multi-currency reporting.
- The deletion of unnecessary or out-of-date metadata and reorganization of alternate hierarchies to a cleaner, more user friendly solution.
- The expansion of metadata to match source systems and allow for more granular reporting.

## Results

- Implementation allowed the admin more control to own the system without reliance on the IT team.
- The addition of the revenue planning cube allowed for better, more detailed revenue reporting.
- Alternate hierarchies were converted to attribute dimensions to cut down on maintenance while providing a cleaner reporting experience.
- Numerous business processes automated through the use of EPM Automate.
- Multi-currency reporting capabilities built into the system.
