Oracle PBCS

Partner Use Case Summary

SC&H Group implemented two Oracle EPBCS applications to support corporate and operational planning, as well as management and statutory reporting needs. These applications shifted Inovalon to a world-class planning process and enabled them to have new insights into their business.

Top Customer Objectives and Challenges

- Lacked a standardized planning process
- Wanted to streamline internal management reports and external statutory reports
- Needed to gain insight into operational workforce capacity and demands
- Foundational solution to meet evolving requirements
- Flexibility and scalability in the planning process

Results

- Enabled Inovalon to have a streamlined financial close and planning process with standardized reporting
- Improved efficiency and accuracy in the planning process
- Moved from Excel based processes to a modern cloud-based technology solution
- Utilized EPBCS in an innovative way to model workforce capacity and demand
