

The All-in-One Solution That's Reshaping the Industry

OneStream's extensible dimensionality offers next-gen solutions for businesses who want ultimate flexibility

The SC&H Group team will guide you through a successful implementation of OneStream XF, the Unified SmartCPM™ Platform that has revolutionized accounting, finance, and operational functions. With a successful OneStream implementation, your business can manage multiple essential processes through a single solution, including:

Financial Close & Consolidation

Reporting, Analytics and BI

Planning, Budgeting and Forecasting

Financial Data Quality

Our team will help you make the most of this solution and fine-tune your implementation down to the most critical details. It's a powerful platform, and the team will ensure that it matches your business's unique strengths and goals.

A New(er) Approach

Founded in 2013, OneStream is a relative newcomer to the world of Corporate Performance Management (CPM) software, but don't get the wrong idea: its creators have over 30 years in the field and prior to their roles at OneStream were responsible for building some of the leading business process technology on the market. With that background, it's no surprise that OneStream's all-in-one approach has become industry standard in record time.

There are a few simple reasons for that quick climb. First, all business processes are aligned in a **single OneStream platform**. Users don't need separate applications or software solutions to analyze every aspect of their data. Financial consolidation, planning, reporting, analysis and data quality – all in the cloud – integrated like never before.

Second, OneStream boasts **extensible dimensionality**; allowing absolute flexibility to preserve high-level dimensionality and customize the platform uniquely for different business functions. The extensible capabilities can trim consolidation times while giving each business unit the required detail to accurately analyze results.

Lastly, OneStream has a deserved reputation for their razor-sharp **focus on customer success**. They offer total technology support from the moment the solution is acquired, and their support team is rightfully lauded. Their 'call any customer' approach to references provides each prospect the unique ability to match references with its organization's goals, size, and industry.

A Proven Partner

With all that potentially at your fingertips, it's essential to make sure that OneStream is the best solution for your business needs. You need a partner that can help you identify this platform's usefulness for your company and implement it for maximum value and ease of use. SC&H will guide you through every step of our OneStream implementation process:

- Discovery/Requirements Assessment
- Executive Visioning
- Findings Recommendations
- Strategic Roadmap

Our team is made up of business strategists mixed with finance and accounting professionals, with the skill-set to envision the bigger organizational picture and the expertise to drill-down to the weeds on finance and accounting best practices – all positioning your business to maximize its OneStream ROI. Like OneStream, we regularly outperform larger competitors through close collaboration and partnership with our clients. By working with SC&H, you'll get the same custom-built, flexible approach, and implementation expertise that we bring to every client, from mid-market enterprises to Fortune 500 businesses.

For almost 20 years, our practice has rolled up our sleeves to lead organizations through all stages of business performance management and process re-engineering – be it budgeting and planning, financial close and consolidation, data analytics, and more. Our rich history leverages a proven process that starts by identifying your unique challenges and your business's core values and strengths. Then we build an implementation approach that honors your unique qualities and positions you for the next step in your work. Whether you're looking to become more efficient, scale-up and expand, or improve your reporting and supply-chain processes, we can utilize OneStream XF to create a long-term solution that can be implemented painlessly.
